Hello,

We move the server to a new machine, and new 2015 data has been updated, also some years color table has been updated. The value depends on the new color table.

Subject: NASS CDL products

Hello,

I have a quick question about the format of the CDL Tiff files downloaded from CropScape. I noticed that to NoData Value of the tiff's has changed. It used to be set to '0' but now there is no value set. Just wondering if or why this was changed?

Thanks,
Diya
